

INTERN AND VOLUNTEER OPPORTUNITIES

Looking for interns/volunteers to work for Climate Change

Mike and I woke up the morning after the election realizing that we needed to do something important –and swiftly --for climate change, an issue that can't survive 4 years.

We have founded www.climatechangeresources.com and need your help now.

Editorial: We need smart, committed minds with the interest and the ability to find, judge, and summarize great articles, books, organizations, films, creators, courses, events—all of which we want to make available and link to in a readily accessible way on our CCR website. We want to organize this information by sector (wind, solar) and by state. If you want to work on content you will be reporting to Lena and/or Mike.

Web Development: We need smart, nimble, creative coders and web designers to help build a highly complex website with ultimate clarity. You will be reporting primarily to Mary Tiegreen, our designer.

Join us now! This issue really has no time to lose.

See our mission statement (and bios) here: www.climatechangeresources.com
